

An up-country paper—the *Singapore Courier*—has been publishing articles for itself of Chinamen by force. We are glad this advice comes from a Republican paper. Had any one of the mercantile journals of this State given such notice, we should have regarded it from the Radical ranks such a blow as persecution as only loud-mouthed Tories could afford. The *Courier* is a paper of the kind, and it is published in a locality that has been robbed of wealth and had its natural resources plundered by Chinamen. It is not surprising we may well denounce them as a nuisance. But for the Chinamen, Shasta county would to-day furnish employment for hundreds of white men. Her population would be doubled, and her agriculture her condition much more prosperous. Thousands of Chinamen have filled gulches, creeks and flats, and burr holes are worked out and abandoned, and mountainsides are denuded of timber, and none of the miners settle there because won't have been very difficult had some but white men worked the mines. It is not surprising that the old argument that Chinamen could not harm the mining districts

for the reason that their operations were confined to such mines as we have not yet begun to work, have manifested little, if any better qualities. The mines grew scarce the white man would have worked these no longer haunted by the Chinamen. They were driven to the coast, where they found homes and made their little gains adding wealth and population, where now is neither homes, gardens, we see no people. The *Courier* understands that the Chinese are not the only ones who have stripped the county of wealth. But an appeal to force is the proper mode of procedure to rid the county of the Chinese. The Chinese are here and under the existing laws others—hundreds of thousands of them—will follow their friends. The belief is the only means by which we can rid the county of the Chinese. It is the sooner the workmen of the county come to understand this the better. They will then learn the importance of placing no man in office who will not be able to do this. It is the duty of our treaty with China to an extent which will prevent the immigration of her people to our shores. The treaty

The State Fair of the State of California, which is the largest and one of the most productive of the most beautiful fairs in the world, is held annually in the city of San Francisco. The fair is held in the city of San Francisco, and is the largest and one of the most productive of the most beautiful fairs in the world. The fair is held in the city of San Francisco, and is the largest and one of the most productive of the most beautiful fairs in the world. The fair is held in the city of San Francisco, and is the largest and one of the most productive of the most beautiful fairs in the world.

The satisfaction of runners of steeplechase and harness races is well known. The State Society has been instructed for the convenience of the designer to make entries of cattle, stock, and the stalls and stable equipment, and the State Society has already been announced as participating in the equine contests that will follow. The fair, as the public order and well adapt to the purpose intended.

The State Society is entirely unopposed to the funds in the treasury being managed by thorough business men who by strict attention, to the best interests of Society, and by pursuing the same, will be able to maintain its integrity as distinguishes them in the private business, have resuscitated the institution, and placed it on a permanent basis. The coming fair will be a magnificent one in every respect, satisfactory to all who attend it, and highly recommended to the interests of the State Agricultural Society.

The speed programme has never been

MERCANTILE LIBRARY BALLOTS
A Bito Job—The Sacramento Register has a story that the Bito Co., job printers, of this city, yesterday finished the largest job of the Register's printing history. It was the printing of 200,000 ballots for the drawing of the Mercantile Library Lottery. These ballots were printed on a special machine, and the type were used. The leather was cut in strips about a foot long, and one-quarter inches in width, and were run through a special machine, and a security numbering machine, the one owned by Crocker & Co., being used only on the coast, and we believe there are only two in use in the United States. After being printed they were cut into an oval shape, one inch long and one-half inch wide, and were packed by means of a "pusher," which is eight at one time. Of these ballots 200,000 have been printed and cut, and the remainder will be printed and cut in the next few days.

After the work was fairly under way, sixteen thousand of these were printed and cut in one day. After being a few days in the hands of the printer, he is holding 1,000. The packing of the boxes for shipment to San Francisco will be finished this morning. They are packed in boxes of two dozen each, and will occupy two boxes three and one-half feet high, the same in length and width. The boxes will be marked with the number of the ballot. The ballots are as nearly numbered as any common ticket numbering can be. The job is one of the heaviest ever done in the printing office of the Pacific coast, and could have been done in no other establishment in the State.

this stands Rhode Island, which give thousand majority to the Radicals. This is a fair indication of the rural public sentiment in the country. North and South, the people are tired of Radical corruption and misrule.

THE YOLO DEMOCRAT.

Miscellaneous Items.

The steamboat Gen. Schuyler carries passengers from New York to Sing Sing and back, and the Adolph charges nothing.

The Republicans did not carry a county in Kentucky at the recent election, and the Democratic majority is over fifty thousand.

There exists quite a demand for laborers on section work, along the line of the California Pacific Railroad. So says the Marysville Appeal.

The French lost in killed and wounded at the battle of Worth, Welsenburg and Sarbrück, 35,000 soldiers, besides many thousands of prisoners.

COMMODORE VANDERBILT had an attack of apoplexy, on the 18th inst., at Saratoga Springs. He has so far recovered as to be able to go about as usual.

THE BROWN of the State Geological Survey, is now engaged, near Corvallis, on Lake Tahoe, in mapping the extinct volcanoes and sources of the Nevada River.

J. F. NEUMANN, the pioneer silk man, who took the flag for the National Capital, in Washington, last spring, has returned, and says the flag was very much admired at the East.

It is stated that every farm of 100 acres in Eastern Kansas is underlaid with 1,555,000 tons of coal, or nine times more fuel than the surface was covered with in the timber.

"Now my little boys and girls," said a teacher, "I want you to be very quiet—so that you can hear a pin drop." In a minute all was silent, when a little boy shrieked, "let her drop."

DR. LIVINGSTONE is alive once more and has been heard from. Dr. Kirk, at Zanzibar, has had a letter from him, and he is soon to make his appearance at one of the European settlements.

PLUMBERS drive one in hand, moderately rich men drive two, Vanderbilt drives three, Bonaparte drives four, Fish drives six; and to wind up with, Helmbold sports eight in hand at Long Branch.

WAGONS of the State University building are as follows: Bricklayers, per day, \$4.00; stone-cutters, \$4.00; masons, \$4.00; carpenters \$3.50; mason's laborers, \$2.50. They are paid every fortnight in gold coin.

The Chicago Post says that Mr. Frelinghuysen, having declined the Mission to England, President Grant offered the place to Senator Trumbull. It is understood that Judge Trumbull will not accept, preferring to remain in the Senate.

AN assistant United States Marshal in Louisville, in taking the census, asked a colored woman what personal property she possessed, to which she replied, "Nuthin' but dese fere chillen, an' dey ain't w' no much since de emancipation proclamation!"

A DESTRUCTIVE fire occurred in Marysville on Saturday morning. The brick building occupied principally as a Commission house by Frank G. Bell, was completely gutted, and most of the goods destroyed. The total loss will reach about \$10,000. No insurance.

Reclaiming Tule Lands. Much attention is now being paid to the cultivation of tules for grain and vegetables, which afford good crops where other lands fail during a dry season—as demonstrated this year at Sherman Island and other points, where tules farmers will reap rich harvests. The tules of this country will be made more valuable, if we will for our readers to understand that the work of reclaiming Roberts' Island is fast progressing. Under the supervision of Captain Boolor, of San Francisco, plans have been drawn for a dam being constructed, after which Roberts' (after whom the island is named) ditching machine will be employed. This machine is worthy of perfection by mechanics and owners of tules lands, for it certainly will prove very instrumental in advancing the interests of farmers. In its perfection Mr. Roberts has spent six years of intense study, and a large amount of capital. We have no space to describe its complicated machinery. The machine requires ten men in attendance when in full running order, and will perform the work of one hundred Chinamen in a given time. Its capacity for ditching surpasses even the most sanguine hopes of Roberts himself. It will cut five feet a minute a ditch six feet wide and four feet in depth. The iron work on the machine weighs eight tons, without including the engine and boiler, so an idea may be formed respecting its size. It would be well for owners of tules lands to make the proper inquiries and examination respecting this machine, and its advantages to arise from its employment. —Yolo Record.

EXAMINE YOUR TEAPOTS.—A caution has lately been largely copied into the domestic columns of newspapers to the effect that cracked dishes, after being long used for holding gruel and fat of any kind, become rancid and unwholesome. And later comes another, with good medical authority to back it, against using tin vessels—more especially teapots—when the inside is rusted or blackened inside. The article contained in the tea, combined with the iron of the exposed portions of the vessel, and forms a chemical compound not unlike ink. It corrodes and darkens the teeth, and cannot be innocuous to the stomach. I have seen the discoloration both of natural and artificial teeth prove so obstinate, from this cause, as to require several stiff brushes, to remove it. When housekeepers hear of any of the family remarking, "This tea tastes ink," it is time to examine—possibly to throw away—the teapot. The most palatable and wholesome tea is made by steeping in a bright tin porcelain cup, then pouring into a freshly scalded earthen teapot. This treated it will acquire the stringent quality so deleterious to the teeth and to the health.

FEARS OF A MADMAN.—The following is from the Oakland Transcript of the 1st inst. A Deputy Sheriff, Baldwin, of San Pablo, was returning home from a business trip to the city last Friday, he was called upon, when, in a mile of San Pablo, to take charge of a raving maniac who had been destroying property and attempting to kill some men at work in a wheat field near by. The maniac's name was Curran, a Canadian. He appeared a thrashing machine, while it was in operation, and threw a pitchfork into the cylinders, breaking the machine into a great many pieces and damaging it to a heavy extent. He then caught up another fork and chased the men around the field for some time. Baldwin had a hard time in keeping the man from doing any more mischief, and took him to San Pablo, from whence he was taken on Monday to Marysville.

WOMAN.

Females, owing to the peculiar and important relations which they sustain, their peculiar organization, and the offices they perform, are subject to many sufferings. Freedom from these contribute in no small degree to their happiness and welfare, for none can be happy who are ill. Not only so, but no one of these various female complaints can long be suffered to run on without involving the general health of the individual, and are long producing permanent sickness and premature decline. Nor is it pleasant to consult a physician for the relief of these various delicate affections, and only upon the most urgent necessity will a true woman so sacrifice her greatest charm as to do this. She will then thank us for placing in their hands simple specifics which will be found efficacious in relieving and curing almost every one of these troublesome complaints peculiar to the sex.

HELMHOLD'S EXTRACT OF BUCHU.—Hundreds suffer on in silence, and hundreds of others apply vainly to druggists and doctors, who either merely tamize them with the hope of a cure or apply remedies which make them worse. I would not wish to insert anything that would do injustice to the afflicted, but I am obliged to say that although it may be produced from excessive exhaustion of the powers of life, by laborious employment, unwholesome air or food, profuse menstruation the use of tea and coffee, and frequent childbirth, it is far often caused by direct irritation applied to the vagina itself.

When reviewing the causes of these distressing complaints, it is most painful to contemplate the attendant evils consequent upon them. It is but simple justice to the subject to enumerate a few of the many additional causes which so largely affect the life, health, and happiness of woman in all classes of society, and which, consequently, affect more or less directly the welfare of the entire human family. The mania that exists for precocious education and marriage, causes the years that nature designed for corporeal development to be wasted and perverted in the restraints of dress, the early confinement of school, and especially in the unhealthy excitement of the ball-room. Thus, with the body half clothed and the mind unduly exercised by pleasure, perverting in midnight revel the hours designed by nature for sleep and rest, the work of destruction is half accomplished.

In consequence of this early strain upon her system, unnecessary effort is required by the delicate votary to retain her situation in school, at a later day, thus aggravating the evil. When one excitement is over, another in prospective keeps the mind morbidly sensitive to impression, while the now constant restraint of fashionable dress, absolutely forbidding the exercise indispensable to the attainment and retention of organic health and strength; the exposure to night air; the sudden change of temperature; the complete prostration produced by excessive dancing, must of necessity produce their legitimate effect. At last, an early marriage caps the climax of misery, and the unfortunate one, hitherto utterly regardless of the plain dictates and remonstrances of her delicate nature, becomes an unwilling subject of medical treatment. This is but a truthful picture of the experience of thousands of our young women.

Long before the ability to exercise the functions of the generative organs, they require an education of their peculiar nervous system, composed of what is called the tissue, which is, in common with the female breast and lips, evidently under the control of mental emotions and associations at an early period of life; and as we shall subsequently see, these emotions, when excessive, lead, long before puberty, to habits which sap the very life of their victims are nature has self-completed their development.

For female weakness and debility, whites of leucorrhoea, too profuse menstruation, exhaustion, too long continued periods, for profligate and bearing down, or prolapsus uteri, we offer the most perfect specific known—HELMHOLD'S COMPOUND EXTRACT OF BUCHU.—Directions for use, diet, and advice accompany.

Females in every period of life, from infancy to extreme old age, will find it a remedy to aid nature in the discharge of its functions. Strength is the glory of manhood and womanhood. HELMHOLD'S EXTRACT BUCHU is more strengthening than any of the preparations of bark or iron, infinitely safer and more pleasant. HELMHOLD'S EXTRACT BUCHU, having received the endorsement of the most prominent Physicians in the United States, is now offered to afflicted humanity as a certain cure for the following diseases and symptoms, from whatever cause originating: General Debility, Mental and Physical Depression, Impediment, Ideas, Hysteria, General Irritability, Restlessness and sleeplessness at night, Absence of Menstrual Efficiency, Loss of Appetite, Dyspepsia, Emaciation, Low Spirits, Discoloration or Paralysis of the Organs of Generation, Puffiness of the Feet, and, in fact, all the concomitants of a Nervous and debilitated state of the system. To insure the genuine, cut this out. Ask for HELMHOLD'S. Take no other. Sold by Druggists and Dealers everywhere. Price \$1.25 per bottle, or six bottles for \$6.50. Delivered to any address. Describe symptoms in all communications. Address H. T. HELMHOLD, Broadway, N. Y.

NONE ARE GENUINE UNLESS DOWN IN steel engraved wrapper, with the name of H. T. HELMHOLD, and signed by H. T. HELMHOLD, Wholesale Agents in Sacramento, Cal., at 207 N. E. ST. & CO., 1147 street.

WAGONS! WAGONS!

I HAVE A FEW OF THESE GOOD AND THOROUGHLY REASONED WAGONS

On Hand and For Sale yet!

I defy Competition!

Even from the Eastern States, I have wagons of different sizes; that is, 2, 4, 6, 8, 10, 12, 14, 16, 18, 20, 22, 24, 26, 28, 30, 32, 34, 36, 38, 40, 42, 44, 46, 48, 50, 52, 54, 56, 58, 60, 62, 64, 66, 68, 70, 72, 74, 76, 78, 80, 82, 84, 86, 88, 90, 92, 94, 96, 98, 100.

Prices Range \$125 to \$275.

I also have finished quite a number of fine TOP AND OPEN BUGGIES,

Carriages and SPRING WAGONS.

ALL WORK IS WARRANTED.

Carriage Repairing, Painting and Trimming done with neatness and dispatch.

SECOND-HAND BUGGIES FOR SALE.

C. ELLIOTT, Main street, Woodland.

Woodland to New York.

FLEISHMAN & KAUFMAN

congratulate the citizens of WOODLAND

and surrounding country, on the completion of the great

PACIFIC RAILROAD!

and beg leave to inform them that having made arrangements with our House in

PHILADELPHIA,

will continue to

Import Direct from the East

all the new and latest styles.

We call the particular attention of the Ladies to

Our Dry Goods Department,

where will be found an

Immense Assortment

— or —

Moire Antique, Dress silks, French and English silks, Poplins, Mohairs, Empress, Merinos, Alpaca, Scotch Plaid, Woolen and Cotton Delaines, Linens, Lawns, etc.

Also, a full assortment of

WHITE GOODS,

consisting of

Bleached and Unbleached Domestic, Irish Linen, Table Cloth, Napkins, Towels, Handkerchiefs, Hose, Cuffs, Collars.

We also call particular attention to our

Cloak, Millinery and Lace Department,

where will be found the latest styles of

Broche, single and double Shawls, Black Silk Cloaks, Basques, Sacques, etc.

Also the latest novelty of

Bonnets and Hats.

— or —

Leghorn, Chiff, Spill, Silk and Velvet. Also a great variety of Gimp and other Laces.

The attention of the Gentlemen is called to our

Clothing Department,

where they can easily be suited to a

Fine Dress Black Suit, French Beaver do., Fancy Cassimere do., Business Suits, etc.

Hats, Boots and Shoes.

The finest assortment of Ladies' Balmorals, California and Morocco Shoes.
